## New Equipment

Just delivered – our new CMM.

To compliment our gear and spline measuring CMM, we have just taken delivery of a Micro-Vu Vertex 251.

The Vertex measuring system will allow our inspection department to produce inspection reports with InSpec software from both optical and touch probe measurements of small and medium sized components.

### ISO9001:2008

Following our last quality management system audit by BSI we were awarded a certificate of registration to the latest edition of the ISO9001 standard. This is in addition to our registration to BS EN 9100:2003.
